

Why now is the time to implement rugged hardware

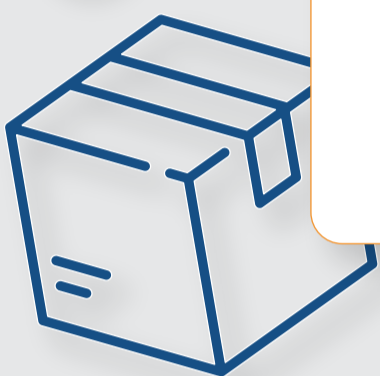

Rugged hardware is being used to boost productivity in busy logistics environments across the world. If you're thinking about purchasing new handhelds, tablets, wearables or other similar tools for your business, whether for the first time or to update ageing equipment, we can help.

We've compiled some of the biggest benefits to consider, to show why now might be the perfect time to invest.

Reduced cost of ownership

With technology constantly evolving, rugged hardware is more accessible than it's ever been before. The market now has options at various price-points, so even if you couldn't quite justify the investment before, you're more likely than ever to find a solution that fits your budget and working environment.

Increased product lifecycle

Gone are the days when you'd have to replace your hardware solutions every year – today's models are built with the future in mind. Applications and operating systems can be updated easily, so your investment will last long into the future. That means more time for staff to become familiar and less for you to spend out on.

Low failure rates

The latest rugged hardware includes sophisticated pieces of kit, and they're built to last. What's more, the applications and operating systems they use have been refined to ensure maximum reliability – just what you need in a fast-moving logistics space.

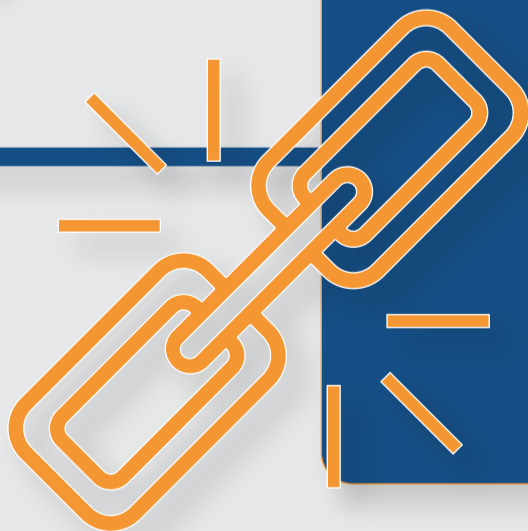

Robust support

As the rugged hardware market has grown, so too has the level of support available from suppliers and manufacturers. As a leading provider of warehouse and logistics technologies, TouchStar is on hand to help customers during implementation and beyond, to ensure you get the best possible return on your investment.

Rugged ability

It goes without saying that rugged hardware should be tough, but today's models are something else. Built with the strongest materials and methods to withstand extreme temperatures as well drops, knocks, scuffs and scrapes, they're perfect for a long, hard life in your business.

Still not sure how rugged hardware could benefit your business? We're happy to answer any questions – speak to TouchStar's experts today.
